

Protect your business from disruption, financial loss and reputational damage.

Over 90% of cyberattacks start with email - and the sophistication and volume of cyber threats continues to grow. Libraesva provides exceptional email security by integrating cloud email and a secure email gateway with our unique Adaptive Trust Engine that uses Artificial Intelligence to learn the usual patterns of behavior for organizations & individuals, continuously assesses the strength of business-to-business trust and proactively holds anomalous traffic.

## BLOCK THREATS

Block known and emerging email threats from reaching their target, so you only receive legitimate messages.

- Scan and filter all inbound and outbound emails for advanced malware, phishing, business email compromise, spam and more
- Gateway and cloud email API - get the best of both worlds with integration to your cloud email combined with secure gateway scanning for complete visibility of email traffic
- Protect users from visiting unsafe sites with active URL analysis that checks every link at time of click, to overcome obfuscation, encryption and other evasion techniques
- Gateway sandbox removes dangerous payloads and active content from attachments

## PREVENT FRAUD

Prevent business email compromise, phishing and email account takeover with advanced behavioral protection to stop theft and financial losses.

- Adaptive trust engine learns usual patterns of communication behavior for organization & individuals
- Machine learning continuously assesses strength of business to business trust
- Proactively hold suspicious email sends to prevent imposter account takeover
